

# OSNOVNA ŠOLA PIVKA

## INVESTIGATING CLIMATE CHANGE

### Marijina zgodba

Učenci berejo Marijino zgodbo.

Učenci povezujejo slike z zgodbo.

Učenci poiščejo v razpredelnici ključne besede iz besedila.

Učenci naštejejo nekaj posledic podnebnih sprememb in povežejo slike s posledicami.

Učenci se zamislijo nad posledicami podnebnih sprememb in narišejo zemljo, kakršna bo čez sto let, če ne bomo začeli skrbeti zanjo.

Učenci se odločijo, kaj bodo pri sebi spremenili, da bi pomagali pri ohranitvi sveta.

### WE MUST DO SOMETHING TO SAVE OUR WORLD!

- 1 We will turn off the lights when we are not in the room.
- 2 We will have a shower instead of having a bath.
- 3 We will try to persuade our parents to walk short distances or ride a bike instead of going by car.
- 4 We will share our ideas with our friends.

Učenci: Leon , Miha, Jasmin, Klemen, Mukadeska, Tinkara, Seide

Mentorica: Jelka Čeligoj

## EXERCISES:

1 Read the story.

2 Match the pictures with the story.

3 Find the key words in the word search.

### Mary's Story

W	I	Q	M	U	L	J	Y	N	C	L
K	M	Q	O	P	T	O	Q	R	A	A
T	H	G	U	O	R	D	O	K	A	L
D	I	N	I	S	S	T	E	H	X	M
I	T	I	V	H	P	T	Q	B	C	U
R	O	Y	L	O	U	A	Q	F	X	S
A	R	R	H	R	Y	R	U	R	A	L
L	A	D	K	N	S	T	A	O	G	F

MARY

POSHO

RURAL

SCHOOL

4 The effects of the climate change can be seen all over the world. Here are some pictures of the effects. Match the names of the effects (1-7) with the pictures (A- H). Look at the example.

EFFECTS OF CLIMATE CHANGE

A

B

C

D

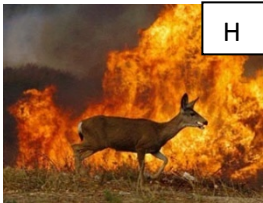

E

F

~~G~~

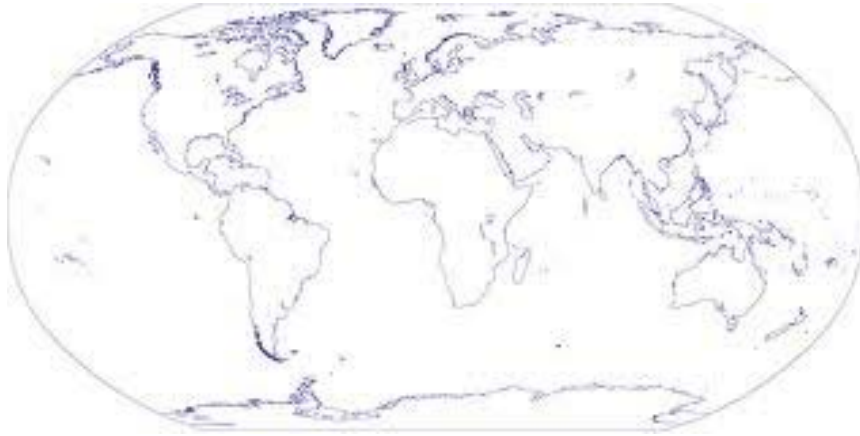

H

	name of the effect	picture
0	<i>Disease</i>	<i>G</i>
1	Drought	
2	Famine	
3	Flood	
4	Landslide	
5	Tornado	
6	Typhoon	
7	Wildfire	

**5 Imagine what the world will be like in 100 years' time if we don't start looking after it. Colour the map.**

**WHAT WILL THE WORLD BE LIKE IN 100 YEARS' TIME?**

**6 Think about the effects of climate change and decide what you will do in order to save the world.**

I will

- 1
- 2
- 3
- 4

*Photos: from the Internet*

## REŠITVE NALOG: / KEY:

### 2 Matching the pictures with the story.

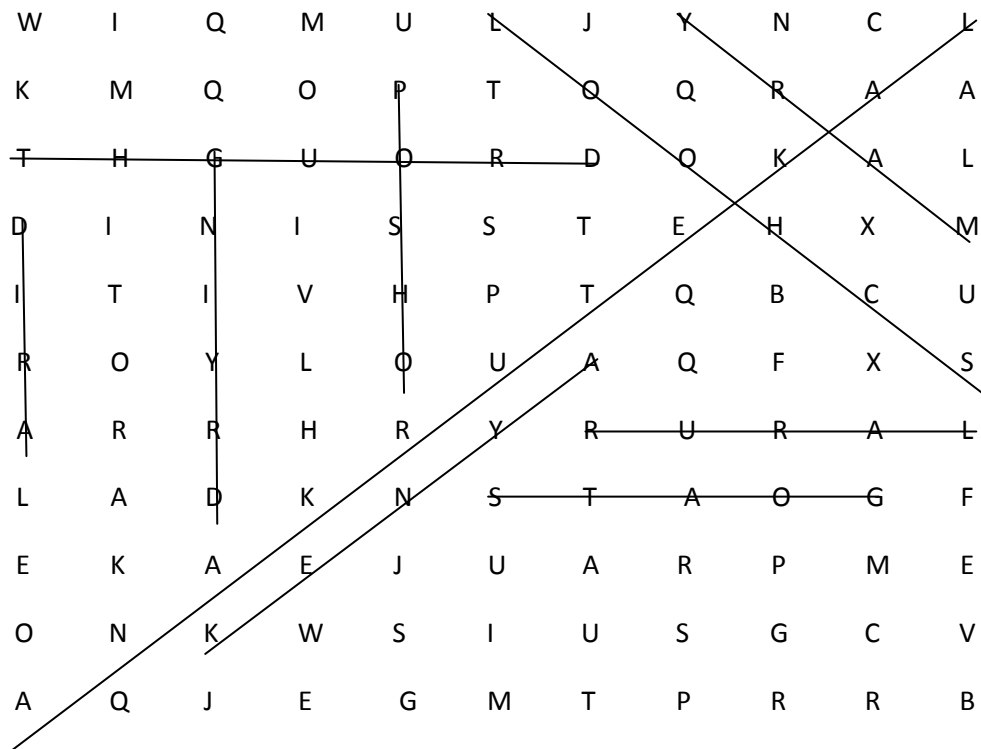

Mary goes and fetches water from the river,  
which is about 1 kilometre away.

Mary's brother looks after the goats and  
ensures they get enough pastures to eat.

### 3 Word search.

#### Mary's Story

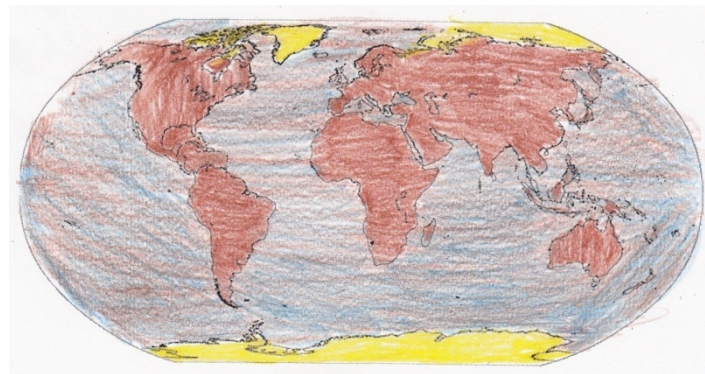

## 4 Effects of climate change

	name of the effect	picture
0	<i>Disease</i>	G
1	Drought	C
2	Famine	B
3	Flood	A
4	Landslide	F
5	Tornado	E
6	Typhoon	D
7	Wildfire	H

## 5 What will the world be like in 100 years' time?

A possible answer:

## 6 What will you do in order to save the world?

Possible answers:

- 1 I will turn off the lights when I am not in the room.
- 2 I will have a shower instead of having a bath.
- 3 I will try to persuade my parents to walk short distances or ride a bike instead of going by car.
- 4 I will share my ideas with my friends.

Učenci 8. in 9. razreda so ob prebiranju zgodb zapisali lastna mnenja o tem, kako in kaj bi bilo potrebno storiti, da se take stvari, ki so posledica globalnega segrevanja, čemur je vzrok človekova dejavnost, ustavile in bi bilo takih zgodb vedno manj.

Mati Zemlja nam je dala življenje, zdaj je čas, da ji ga vrnemo mi!

Mentor: Janez Vičič

## **THREE WAYS TO SAVE THE EARTH**

by Tinkara Volk 8.b

Helping to save the Earth is essentially a very simple task. I'll present three ways to protect the Earth:

### 1. Wind energy:

The wind is a renewable source of energy and with wind turbines it can be very easy to produce a lot of electricity. Of course, it is very easy to reduce consumption of electricity at home by yourself.

### 2. Solar energy:

You can heat the house by using solar cells that operate efficiently and ecologically.

### 3. Use of electrical energy from the seas and oceans:

Tide, currents and waves can produce a lot of electricity for many generations.

Renewable sources like solar, wind energy and energy from the seas and oceans should be used as soon as possible to save and protect the environment.

## GOING GREEN

by Liza Abram 8.b

It is very important that we care for our planet. Going green is easier than you think. There are little things you can do every day to help reduce greenhouse gases and make a less harmful impact on the environment. Taking care of the Earth is not just a responsibility - it's a privilege.

1.- Pay attention on how much water you use. The little things can make a big difference. Every time you turn off the water while you're brushing your teeth, you're doing something good. Try drinking tap water instead of bottled water, so you aren't wasting all that packaging as well.

2.-Walk or ride a bike to school, work or anywhere else. This will save a lot of energy and at the same time you'll improve our health. If you don't go by bike, at least use public transport. Every car not on the road makes a difference.

3.- Recycle. This can help reduce pollution just by putting the bottle that in a different box. Plastic bags are not bio-degradable, so when you go to a store, take a bag with you. People spend 1 million bags every minute; the Slovenian average is 200 to 300 annually. Put used batteries in a special box. Batteries are also very harmful to the environment.

4.- Do not forget to save energy. When you leave the room, do not forget to switch off the lights. Turn off the TV when you're finished watching. Use low energy light bulbs, which burn much longer than ordinary.

Here are some tips that should be taken into account. We can do something to help the planet every day. Step by step we will live on a clean and unpolluted earth.

## **CLIMATE CHANGE**

by Urban Krajnc 9.b

The climate on Earth is changing very quickly. We must mediate and change the weather. The glaciers are melting already. Each one of us can make a change. We can start saving money and give it to charity or we can buy some food, drink and clothes, and give it away for poor children. Older and more successful people can make more difference than us, children. They can drive less and take the bus or even better take a bike or go by foot. Managers of big factories can put smoke filters in big chimneys and managers of big car factories can make more nature friendly cars and put filters in exhaust. There are too many wars on this planet. If we want to save an environment, we must find a solution for all national and religious problems. The deserts are spreading and we still have no solution for our climate.

# TEN WAYS TO SAVE THE EARTH

by Maja Požar 8.a

## 1. SAVE THE OZONE

- the ozone is an atmospheric layer in our atmosphere
- it stops dangerous ultraviolet rays
- UV rays make skin diseases
- but it's got holes, and we are making them

## 2. BE AN ECOLOGIST

- you know what that means

## 3. USE GREEN ENERGY

- solar power
- wind
- tide
- waves

## 4. CHANGE VEHICLES

- planes, ships, cars, trains ... use them only when necessary

## 5. PROTECT NATURE

- don't throw away antibiotics, ammonia, asbestos, fertilizers, phosphates, lead...
- recycle

## 6. SAVE THE FORESTS

- they are the air factory and the lungs of our planet

## 7. SUPPORT SCIENTISTS

## 8. BE POSITIVE

## 9. SMILE AT SOMEONE

And the last one? What do you think?

Add your idea to this list and help changing the world and make it last longer!
