

ŽIVI PREPROSTO IN SOLIDARNO – V SMERI PODNEBNE PRAVIČNOSTI

Meseca novembra 1 teden izvajamo akcijo zmanjševanja odpadkov. V tem tednu predlagamo, da:

- pri malici ne dobivamo sokov v tetrapaku,
- ne dobivamo plastičnih nožev,
- manj hrane iz pločevink,
- bi kuharice same pripravile rezance,
- bi čim manj uporabljali čistila na šoli,
- bi pri pouku imeli drugačen dostop do učnih listov (spletne naloge),
- pijač ne bi kupovali v plastenkah, temveč v steklenicah,
- imamo za vsakdanje kupovanje vrečke iz blaga,
- v trgovinah manj kupujemo.

Spoštovani g. predsednik,

V mesecu novembru je potekal teden zmanjševanja odpadkov. Čeprav se mnogi še ne zavedamo, a vedno večja količina odpadkov povzroča mnoge klimatske spremembe. Zavedamo se, da če želimo varčevati z odpadki, moramo tudi obvestiti ostale prebivalce Slovenije. Predlagamo, da v tem tednu, in tudi v prihodnje, uporabljamo in kupujemo stvari, ki se jih da reciklirati. V šolah pa želimo, da bi kuharice večkrat pripravljale in skuhale hrano in s tem zmanjšale količino odpadkov. Ljudje pa bi si lahko pridelali svoje pridelke, če bi imeli možnost.

HOW GREEN ARE WE?

TIPS:

It's better to have a shower than a bath. We use less water and energy.

It's better to turn off the water. We use less water.

It's not a good idea to use hairspray. Some bottles have CFCs which are bad for the ozone layer.

It's better to go by foot or on bike. Cars use a lot of energy and pollute the air.

Recycled paper is best. People cut many trees and use lots of bleach to make paper.

Cans or glass bottles are best because we can recycle them.

The recycle bin is the best place. We have to put our bottles in the correct place.

We don't need so many electric devices.

Mary Amodoi's story

The main theme of the text is life of a girl named Mary Amodoi. It takes place in Turkana, that's a place in Kenya.

Mary needs to take care about her family, because her mother died last December. She has never been to school. She needs to go to the river and fetch some water from the river and she also prepares meals for her family.

I have very different life. I don't need to go for water, because we have water pipes, I also don't need to cook for my family.

Advantage of her life is, that she lives healthier. Disadvantages are really hard conditions for life, hard working, lots of illness and children there don't have any education.

Advantages of my life are technology, which makes our lifes easier. We also have less illness. Disadvantage of my life is, that air here is not so clean, because of a lot of cars.

MARY AMODOI'S STORY

When we read the text, we got to know something about the life in Turkana. We must know that our life is very different from Mary's life and people in Kenya.

She lives in Turkana in northern Kenya with father and three younger brothers. Her mother died last December. She has never been to school. Her family eat just twice a day. Nowadays, there is much more draught and fewer trees and pasture.

My life is so different of hers. My mother is steel a live and I can't imagine my live without her. I have gone to school of my six years and I eat many times on day, not just twice a day.

Advantages of her live are that she doesn't live in a stress and she can to appraise small things in her life, but disadvantages are that she doesn't go to school and she doesn't have a computer, TV... These are our advantages. We have all of these technology and obligatory school, but in our modern life are a lot of people who live in the stress and we have just a little time for each other, because we think that everything else is more important for us as our friends.

MARY AMADOI'S STORY

Our life is very easy and full of modern Technology, but we have to know that everybody doesn't have this luck. A great example is Mary Amadoi with her story, which we had to read. She lives in Turkana in northern Kenya, where the land is very dry and she has to go to get the water 1 km far away. Now I'll describe her life a little bit and you'll see how different it is, comparing my.

Mary's life is very hard, because she's the one who has to take care of the family, because her mother is dead. She needs to cook for the whole family and she doesn't go to school. She lives with her father, grandmother and three younger brothers. I have two younger brothers and both parents. I don't need to cook for the whole family except during a holiday, but I like to do it. See you; my life is so much different. But that's not all. I always have fresh, clean water in almost every room in the house, but she has to go and get it from far place. I normally eat three or four times a day, but for her is not even sure to have one meal.

No matter, that there are so many differences between our life, both of them have some advantages and disadvantages. Of course, my life has more advantages than hers. For example: I go to school every day, I have clean water, I always have enough food... But the only advantage of her life that I see is, that there's no stress. But in our life are also disadvantages, as I have written. I'll start with my. The only thing that's wrong with my life is too much technology and too little communication, because of all those computers... Bad things about her life are: they probably have dirty water, she doesn't go to school, she has to take care of all family...

Mary Amadoi's life is really hard, but not even my is easy. The hardest thing about all this, is, that I know that she's not the only person with this kind of life. I hope that someday all these bad things will continue.

MARY AMODOI'S STORY

Story is talking about Mary's life. Mary is girl from northern Kenya, which has never been in school, just because she doesn't have money, and time for that. She doesn't have mother.

She has to survive with family, because there in Kenya people don't have many food and water. They have to go to river for water, which is 1km away. The land is very dry. Mary's family eats once a day, at good times twice. They eat a dish called posho, which is like porridge made from maize flour. Sometimes they don't have food, so everything is dependent on connection of community.

I can't imagine how will be my life like that. I feel sorry for that kids and people, because they could get education and better life. Now let me compare Mary's life with mine. First I have a mother, at second I go to school every day, I always have enough food and I don't have to go for water anywhere, because I have it at home.

I think that we can't imagine life there, and we don't appreciate enough life and things which we have.
