Navodila za mentorje:

1. možnost: Razrežite 1 komplet igre in poiščete nasprotno pare.

2. možnost: Razrežite 2 kompleta in poiščete iste pare.

Mentor naj izreže kartončke igre in jih pripravi za igro – izrezane kartice so lahko obrnjene navzdol (zakrite) ali navzgor (odkrite), odvisno od starostne skupine udeležencev. Ob tem vam je lahko v pomoč številka poleg smeškota. Ob zaključku igre »Eko spomin« si se izmenjajte mnenja in se pogovorite, kako vi živite v vsakdanjem življenju in kako s svojim dejanjem vplivate na podnebje in okolje.

EKO SPOMIN

Zakaj se pojavljajo podnebne spremembe?

Podnebne spremembe so pojav spreminjanja podnebja na celi Zemlji. V zadnjih tridesetih letih so spremembe podnebja bolj intenzivne in z večjimi posledicami vplivajo na življenja ljudi kot v preteklosti. So posledica človekovih dejavnosti (industrija, promet, energetika, kmetijstvo, gospodinjstva ...) in potrošnega načina življenja. Kažejo se v ekstremnih vremenskih razmerah, kot so suše, poplave in neurja. Danes njihove posledice občutimo že vsi prebivalci Zemlje, najbolj pa jih občutijo prebivalci držav v razvoju (v Afriki, Aziji, J Ameriki, JV Evropi), ki so s svojim načinom življenja najmanj prispevali k tem spremembam. Odražajo se predvsem na njihovem zdravju in pri zagotavljanju osnovnih življenjskih potrebščin (pomanjkanje vode in hrane) ter povečujejo revščino.

Prav vsak izmed nas lahko z majhnimi dejanji v vsakdanjem življenju zmanjšuje podnebne spremembe. Sedaj ste na vrsti vi, da ugotovite, zakaj se pojavljajo podnebne spremembe. Pred seboj imate igro »Eko spomin«. Na vsakem kartončku imate narisano sliko, ki prikazuje kako mi lahko dobro ali slabo vplivamo na okolje okoli nas. V pomoč vam je smeško v levem spodnjem kotu. :) prikazuje, da s svojim ravnanjem dobro vplivamo na okolje in :-(prikazuje negativen vpliv naših dejanj na okolje.
